

Choose one popular website:

1. Website Name

-I chose **Wikipedia**.

2. Is it responsive?

-Yes. The screenshots show that Wikipedia adjusts its layout for different screen sizes, with a mobile-friendly version on phones and a wider layout on desktop.

3. What changes on Mobile?

- On mobile, the website uses a single-column layout with a compact design, making it easier to view and navigate on a smaller screen.

4. What changes on Desktop?

- On desktop, the homepage has a wider layout with the Wikipedia logo centered and language links displayed around it. The search bar is also larger and more prominent.

5. What do you like about the design?

-I like the clean and simple design. It is easy to read, has no visible ads or distractions, and keeps the focus on finding information.

6. Screenshot desktop

7. Screenshot mobile
